I design and ship web products end to end — from the database schema and API to the interface and deployment. I write TypeScript and care about clean architecture and systems that hold up under real load.

01 About me

I am a fullstack developer with a backend focus. Over the last years I have been designing APIs with NestJS, building realtime features over WebSocket, deploying services with Docker and NGINX, and building frontends with Next.js. I can take a project from ER modelling and flowcharts to release, and I work in monorepos with GraphQL and REST. I value readable code, reviews and automation.

02 Work experience

Inova Tech

Fullstack Developer

Oct 2024 — Mar 2026

1 yr 6 mos

- Led project planning, including ER modelling and flowcharts.
- Applied architectural patterns such as MVC, middleware and dependency injection.
- Designed APIs with Node.js, TypeScript and NestJS.
- Led a monorepo with GraphQL/REST servers, batch processing and crawling systems.
- Built realtime features with WebSocket and Socket.IO.
- Built frontends with Next.js (App and Pages Router); integrated APIs via Axios, Fetch and Apollo Client.
- Deployed apps with Docker, Docker Compose, PM2 and NGINX.

LeverX International

Backend Developer

Jul 2023 — Sep 2024

1 yr 3 mos

- Structured backend services using CQRS and MVC.
- Designed and optimised batch data-processing jobs; implemented web crawling.
- Integrated and maintained RESTful APIs for the frontend.
- Built features with React, TypeScript and Redux.
- Handled file and media uploads with Multer; automated workflows with ShellJS scripts.
- Maintained Docker environments and CI/CD pipelines to speed up releases.
- Improved code quality through reviews, testing and Git best practices.

Node.js CQRS REST React Redux CI/CD

03 Projects

★ FLAGSHIP PROJECT

Wardrobe Store

My largest project — a clothing e-commerce platform shipping across Uzbekistan. Category catalog, search, wishlist, cart, one-click checkout, order history, online payments via Click and Payme, Russian and Uzbek UI.

E-commerce Click Payme i18n SEO

Mini-CRM

A CRM for a construction company: roles, tasks per site, a status lifecycle and immutable history. All permissions are enforced in the database via RLS and SQL functions, covered by 31 automated checks.

React TypeScript Supabase PostgreSQL RLS

Code on GitHub

Cars.uz

A car marketplace with fast search and filters.

React Node.js MongoDB

mycars.uz

Evoss.uz

A digital ordering and management platform for restaurants.

Next.js NestJS Tailwind

evoss.uz

Aroma Coffee

A coffee shop website with responsive design and an online menu.

JavaScript GSAP

aroma-coffee.uz

Restaurant Gusto

A restaurant landing page with table booking and a gallery.

React Framer Motion

restaurant-gusto.uz

04 Skills

BACKEND

Node.js · NestJS · TypeScript · Express · GraphQL · REST · WebSocket / Socket.IO · Prisma

FRONTEND

Next.js · React · Redux · Apollo Client · Tailwind CSS · HTML / CSS

DATABASES

PostgreSQL · Redis · MongoDB · MySQL · Supabase

DEVOPS & TOOLS

Docker · Docker Compose · NGINX · PM2 · CI/CD · Linux · Git · Figma

ARCHITECTURE

MVC · CQRS · Dependency Injection · Monorepo · ER Modeling

EDUCATION

Programming course (Korea)

Learned programming fundamentals in a Korean course, then grew through self-study and commercial projects.

TOPIK II certificate

Official Korean language proficiency test.
